

Investment Committee Memorandum

Proposed Acquisition of Volex plc | SAMPLE PLACEHOLDER — replace with your real export

Executive Summary

This memorandum evaluates the proposed leveraged acquisition of Volex plc, a UK-listed manufacturer of electrical connectivity products serving EV, data centre, medical and aerospace end markets. [Replace with your investment thesis summary.]

Company Overview

Founding history, product segments, manufacturing footprint, customer base and management team. [Insert company overview.]

Industry Overview

Market size, growth drivers (EV charging, data centre buildout), competitive landscape. [Insert industry analysis.]

Investment Thesis

Key value creation levers: bolt-on M&A, manufacturing efficiency, margin expansion, structural end-market tailwinds. [Insert thesis.]

Key Risks

Customer concentration, input cost inflation, cyclicalities in industrial capex, integration risk on acquisitions. [Insert risk analysis.]

Historical Financial Performance

Three-year revenue, EBITDA and margin trends. [Insert financial table / chart.]

LBO Structure

Sources and uses, entry multiple, debt quantum and structure, leverage ratios. [Insert structure summary.]

Valuation

Entry and exit EV/EBITDA assumptions benchmarked against comparable transactions. [Insert valuation summary.]

Sensitivity Analysis

IRR and MOIC sensitivity to exit multiple and EBITDA growth assumptions. [Insert sensitivity table.]

Exit Strategy

Trade sale, sponsor-to-sponsor, or IPO exit routes considered. [Insert exit analysis.]

Recommendation

Based on the analysis above, the transaction is recommended for approval subject to confirmatory due diligence. [Insert recommendation.]
